

If you have diabetes, take care of your heart. Having diabetes means you are more likely to have a heart attack or a stroke—but it doesn't have to—if you take care of your diabetes.

Over time, high blood glucose (sugar) can hurt organs in your body such as your kidneys and your eyes. High blood pressure can make your heart work too hard. And bad cholesterol, or LDL, builds up and clogs your heart and blood vessels.

Taking care of your blood glucose, blood pressure, and cholesterol means a longer and healthier life.

ASK YOUR DOCTOR

- What are my blood glucose, blood pressure, and cholesterol numbers?
- What should they be?
- What actions can I take to reach my goals?

Use the **Diabetes Record Form** to write down the answers to these questions.

TAKE ACTION NOW

You can live longer, improve your health, and lower your risk of heart disease or stroke.

- ♥ Eat foods like fruits, vegetables, beans, and whole grains.
- ♥ Eat foods made with less salt and fat.
- ♥ Be active 30 minutes or more each day.
- ♥ Stay at a healthy weight—by being active and eating the right amounts of healthy foods.
- ♥ Stop smoking—ask for help or call 1-800-QUITNOW (1-800-784-8669).
- ♥ Take medicines the way your doctor tells you.
- ♥ Ask your doctor about taking aspirin.
- ♥ Ask for help if you feel down or have trouble with stress.
- ♥ Ask your family and friends to help you take care of your heart and your diabetes.

DIABETES RECORD FORM

Goal

Take care of your heart by taking care of your blood glucose, blood pressure, and cholesterol.

Use this form to keep track of your **blood glucose, blood pressure, and cholesterol**. Work with your health care team, friends, and family to reach your goals.
